Welcome to Pittsburgh Chemical Day 2010

In our 43rd year, we continue to focus on the relevant issues to today's chemical industry. As it continues to evolve, we are faced with new challenges and opportunities that must be managed. Our goal at Pittsburgh Chemical Day is to provide an atmosphere that will help you, as suppliers, customers and managers, to choose the best path for your business.

In addition to meeting and networking with your business contacts, we offer opportunities to hear from industry experts on several interesting and pertinent topics.

Morning Workshop

Presented by Bernard Peterse & Simon Robinson ICIS – Chemical Industry News Ser

A great corporate website is more than stunning graphics, java scripts and animations. It includes the creation of a pleasurable, useful experience for your visitors…An experience they want to repeat again and again!

Join Bernard Petersen and Simon Robinson as they share their experience in website architecture that can help your business with the promotion of your products and services to both existing and potential customers. This seminar will explain the root of unsuccessful business websites and more importantly talk about what actually works on-line.

HOW CALCIUM
HYPOCHLORITE
tablets help kids discover that science is FUN

The connection might not seem apparent at first. Until you realize that PPG is the leader in delivering safe chlorination for applications ranging from pools to drinking water to food processing. And it's our success with these and other innovative products that enables us to support educational opportunities for children. To learn more about how we are unlocking the wonders of our world, visit us online.

Unlocking Potential.
